Candy Caramel Cutting / Sizing Machine - SM500

The Adansonia candy caramel slitting / sizing machine is the perfect solution for cutting confectionery in larger production quantities, such as caramel, toffee, fudge, nougat etc.

This machine not only cuts but thickness sizes the product at the same time. The product is placed onto the infeed section of the machine. As the operator pushes the slab into the driven roller the product is pulled automatically through the blades where it is cut to width and sized to height, passing through onto the outfeed belt for further processing.

FEATURES & BENEFITSS

- Stainless Steel Construction
- Cuts products into strips for further processing
- Easy to use and easy to maintain
- Fully automated with adjustable speed settings
- Shafts set to suit customer product size
- Maximum slab size 500mm wide

Can be used in conjunction with our Candy caramel guillotine machine for further processing into squares or rectangles.
